

## **Materials Storage**

**Christopher G. Hill**  
**The Law Office of Christopher G. Hill, PC**  
**804.205.5155**  
**chrisghill@constructionlawva.com**

### **Storage**

- If materials stored in tiers: stack them, rack them, block them, or interlock them
- Store materials more than 6 feet from any hoistway or inside floor opening
- Store materials more than 10 feet from any exterior walls that do not extend above the top of the stored materials.

### **Materials placed on public streets**

- Well guarded
- Suitable warning signs
- Lighted at night

### **Handling**

- Inspect all rigging equipment for material handling prior to use on each shift.
- Keep aisles and passageways clear
- Alloy steel chain slings have a permanently affixed durable identification
  - States size, grade, capacity and manufacturer
- Hooks, rings, oblong links, pearshaped links, coupling links, and other attachments must have a rated capacity of at least that of the chain
  - Cannot use job or shop hooks and links or makeshift fasteners
- U-bolt clips should be properly spaced and installed when forming eyes in wire rope

### **Disposal**

- Dispose waste materials properly
